### Benefits

- ▶ Compact, lightweight design
- ▶ Easy maintenance
- ▶ Perfect for every industry

### Designed For

- ▶ BSC
- ▶ Education
- ▶ Healthcare
- ▶ Lodging

\* Mop and trash barrel not included.

# TASKI® MicroFit

## Key advantages

The TASKI MicroFit offers complete modularity, flexibility and durability for pre-wetted microfiber cleaning. The intuitive and compact design provides a light weight, ergonomic add-on to existing 40 gallon trash receptacles that enables the cleaner to be more efficient in their cleaning process. The robust all metal frame and high quality components provides peace of mind while helping control costs.

## For Regular Use:

Place the upper mop box hanger frame over the top of the barrel lip. Attach lower mop box holder over the upper mop box support arm. Then attach the wire cloth box holder over the top of the barrel lip. Attach additional accessories and cleaning tools as needed.

- **Manual Pre-Wetting of Microfiber:** Using measuring cup, dampen dry cloths and mops with recommended quantity of cleaning solution. Place in cloth or mop box holders. Close the lid and keep closed to maintain moistness in microfiber. Allow 15 minutes for cleaning solution to absorb into cloths or mops.
- **Mechanical Pre-Wetting with Quantum Cleaning System:** Remove cloths or mops from the washing machine after the cycle is complete. Place cloths or mops in appropriate boxes. Close the lid and keep closed to maintain moistness in microfiber. Allow 15 minutes for cleaning solution to absorb into cloths or mops.
