Environmentally Certified Products

These symbols assure you that these products are not only safer to use, but deliver high quality results and have minimum environmental impact.

About GREENGUARD Environmental Institute

The GREENGUARD Environmental Institute (GEI) is an industry-independent, non-profit organization that oversees the GREENGUARD Certification Program. GEI was founded in June of 2001 to establish a true third-party product certification program based on proven emissions standards and to provide specifying and procurement professionals with a resource for low-emitting products.

About the GREENGUARD Indoor Air Quality Certification Program for Low-Emitting Products

The GREENGUARD Certification ProgramSM is an industry-independent, third-party testing program for low-emitting products and materials. In 2005, GEI announced the GREENGUARD Children & Schools standard, which evaluates the sensitive nature of school populations combined with the unique building characteristics found in schools, and presents the most rigorous product emissions criteria to date. To date, more than 100 manufacturers across various industries offer GREENGUARD Indoor Air Quality Certified[®] Products.

GREENGUARD Certification is a valuable tool for architects, designers, product specifiers, and purchasing organizations that want to locate, specify, and purchase off-the-shelf, low-emitting products for indoor environments. GREENGUARD Certification is a voluntary program available to all manufacturers and their suppliers.

The Environmental Choice Program is designed to support a continuing effort to improve and maintain environmental quality by reducing energy and materials consumption and by minimizing the impacts of pollution generated by the production, use and disposal of goods and services available to Canadians.

Certification under the Environmental Choice Program will be awarded to hard surface cleaning products that demonstrate environmental leadership throughout their life-cycle and meet requirements for:

- Performance
- Limited toxicity for aquatic and other organisms, including both acute/lethal toxicity and chronic/sublethal toxicity risks (e.g. endocrine disruption, carcinogens)
- Biodegradability and low potential for bioaccumulation
- Limits on ingredients that are considered likely to contribute to specific environmental impacts (e.g., eutrophication of water bodies, ground-level ozone-formation, depletion of stratospheric ozone)
- Limited waste and resource use

Green Seal is a non-profit organization devoted to environmental standard setting, product certification, and public education. Green Seal's mission is to work towards environmental sustainability by identifying and promoting environmentally responsible products, purchasing, and production. Through its standard setting, certification and education programs, Green Seal:

- Identifies products that are designed and manufactured in an environmentally responsible manner;
- Offers scientific analyses to help consumers make educated purchasing decisions regarding environmental impacts;
- Ensures consumers that any product bearing the Green Seal Certification Mark has earned the right to use it; and
- Encourages manufacturers to develop new products that are significantly less damaging to the environment than their predecessors.

The intent of Green Seal's environmental requirements is to reduce, to the extent technologically and economically feasible, the environmental impacts associated with the manufacture, use and disposal of products. Set on a category-by-category basis, Environmental Standards focus on significant opportunities to reduce a product's environmental impact.

The JohnsonDiversey Advantage

Beyond clean, we are dedicated
to being the best at simplifying
the lives of our customers.

We are committed to doing this by:

- Investing the time to listen,
understand and respond to customers'
unique cleaning and hygiene needs
- Taking a personal interest to ensure
the facilities they care for are
consistently clean, safe and attractive
- Pursuing innovation in every form
likely to make the lives of our
customers simpler and more profitable
- Partnering with our customers to
exceed their customers' expectations
every day, everywhere
